

2016 Annual Civil Penalty Report

The Pipeline and Hazardous Materials Safety Administration (PHMSA), Office of Hazardous Materials Safety (OHMS) and PHMSA's Office of Chief Counsel processed 42 cases and 256 tickets in calendar year 2016. A summary of all the tickets and cases closed in 2016 are provided in the table below. These actions resulted in the collection of \$941,404 in fines.

Every year the OHMS Hazmat Field Operations staff verifies compliance with the safety and training standards of the Hazardous Materials Regulations (49 CFR Parts 171-180) by inspecting companies and individuals who offer hazardous materials for transportation or manufacture, maintain, repair, recondition or test packages authorized for transporting hazardous materials. Any violations noted in the summary were sanctioned as either a ticket or case depending on its whether it had a direct or substantial impact on safety. Tickets were processed by region offices where the investigator is assigned. Cases were adjudicated by Office of Chief Counsel after a referral is made by the regional office. All tickets and cases were subjected to the response, request and appeal procedures listed in 49 CFR Part 107 prior to collection of the fines.
